TERMS AND CONDITIONS OF CONTRACT

- It is agreed between the signer of the contract and Maritime Solutions, Inc. (MSI) that MSI is NOT responsible for:
 - Snow, ice, or rain damage. Any boats left uncovered are the responsibility of the owner.
 - Any belongings left in the vessel, i.e. lifejackets, lines, seat, oars, pumps, anchors, etc...
- All boats with head systems must be pumped coming to MSI for work or storage. Failure to do so will result in additional charges.
- It is highly recommended that any vessel being stored outside be shrink wrapped. MSI is not responsible for any damage done to owner supplied covers due to weather.
- Our current labor rate is \$125 an hour. Please see the attached price sheet for estimates and prices on winterization services.
- All property is considered a lien against outstanding invoices until such invoices are paid in full. ANY outstanding invoices past due 30 days accrue interest monthly at 2.5% (30% annually). ON invoices past due 90 days or more, said property may, at the discretion of MSI, be sold to cover past due invoices. All charges must be paid in full prior to picking up or having vessels & motors delivered. **NO EXCEPTIONS.**
- At the completion of work requested, MSI is authorized to charge the credit card on file for work & storage. MSI will email or mail a receipt.
- Bottom painting includes parts and labor utilizing one coat as appropriate to hull materials. Custom paint jobs will be charged for the full gallon.
- On all pick-up/delivery hauls customer must be present within 15 minutes of scheduled time. ANY time beyond this will be invoiced at regular shop labor rates.
- Only work indicated/requested and approved (signed) will be performed. Any changes to contract will require written confirmation via email or authorized in person.
- Vessels will be rendered for pick up/delivery on a first come, first served basis. While every effort will be made to meet customers' request for launch dates, it is important to understand that not all boats and motors can be launched in the same week. MSI requires a MINIMUM of 2 weeks' notice prior to desired launch/pick up date. The earlier a customer schedules, the better the likelihood of us meeting their requested date. Please give MSI the courtesy of your requested launch date.
- While every effort will be made to meet a customer's desired launch date, MSI is not to be held responsible for delays due to weather or last-minute scheduling.
- Boats will be cleaned for scheduled pick up/launch date. If customer does not pick up on their scheduled date, MSI will not be responsible for vessels getting dirty while awaiting pick up/launch. A second cleaning, if requested, will be charged at regular rates.
- Engine winterization and tune-ups comply with manufacturers annual or 100hr service intervals. Any additional work is at time and material rates. It is recommended that owners have a commissioning check and tune-up in the spring. MSI is not responsible for engines stored outside of our shop.
- MSI is not responsible for contaminated fuels, organic growth, or any recommended services subsequently declined by the owner. While fuels are stabilized prior to storage, according to American Petroleum Institute and engine manufacturers, non-stabilized fuel has a shelf life of 2 weeks and stabilized fuel of 6 months due to the EPA's restrictions on fuel additives in today's fuel. It is highly recommended that you request MSI to either stabilize your internal tank or remove old fuel.
- Fuel breakdown warranty is 14 days from date of service. MSI cannot be held responsible for ethanol fuel breakdown, phase separation or water formation.
- Owners are required to insure their own vessel from loss or damage or natural disaster. MSI does not insure the boat or engine for any kind of insurance rated claims.
- Warranty on any engine service is 30 days from date of service. If the owner has a problem with a service performed during a non-boating season, the owner MUST notify MSI within 30 days of receipt. (except for fuel system, this has no MSI warranty).
- MSI warranty does not cover travel expenses, towing expenses, sea-trial expenses, contaminated fuels, operator/environmental damage, organic growths, corrosion, lack of maintenance or recommended service intervals, normal wear, water intrusion, incorporation of unsuitable attachments or parts, unauthorized alteration/improper installation, or any causes other than defects in material or workmanship.
